

Café KITP presents:

Star + Star = ?

Stars don't just orbit each other — sometimes they collide! In fact, some of the most exciting events in the universe occur when two stars get close enough to merge. Come collide with visiting KITP astrophysicist **Josiah Schwab** as he gives us a tour of the many kinds of stellar mergers and the varied ways in which astronomers and astrophysicists observe them. Our motto: Eat, *think*, and be merry!

Wednesday, May 31, 2017

6 – 7 pm, doors open for dinner at 5 pm

SOHO Restaurant and Music Club

in Victoria Court

1221 State Street (upstairs), Santa Barbara
